

Triumph

Point of Sale

DISCOVER

a better way to manage
the financial side of your business

TRIUMPH BUSINESS SYSTEMS

So much more than just a point of sale system, Triumph is a powerful financial package designed to take your business to the next level.

Specifically developed for Australian businesses, Triumph is a fully integrated package of business modules that seamlessly link together.

As your business grows, Triumph offers an unparalleled ability to add on modules, making it the most capable financial software package for small to medium size businesses on the market today.

Triumph – incredibly powerful and incredible value for money.

Gone are the days when point of sale technology revolved around the simple cash register. Today, your customers demand the convenience of a variety of payment options, real-time information about product availability and internet shopping to name but a few.

Conversely, a truly powerful retail software is your competitive edge in business. Knowledge is power and the latest generation Triumph V5 Point of Sale software gives you up-to-the-minute information and reports on all aspects of your business. Fully customisable, Triumph software will allow you to identify selling trends, profile customer purchases, track the sales performance of any stock item or personnel and even automate re-ordering while still providing the ease of use Triumph is renowned for.

It's functionality is second-to-none with the ability to operate remotely on iPad®, Windows® or Android® tablets. This allows sales people on the road or the selling floor the unprecedented ability to generate orders in real-time whilst being fully integrated with the Back Office software.

And with our additional web shop integration, benefit from improved work flows and increased sales opportunities 24 hours a day, 365 days of the year.

We first chose Triumph POS software in 1992. Today we are Australia's largest retailer of musical equipment and instruments selling from multiple stores and online. We hold stock on the East and West Coast and Triumph is still driving our business. Aside from easily handling the daily sales and stock transactions, it's real-time inventory management is invaluable. This information is now into our online store, meaning our customers have instant access to stock availability and pricing.

Jon Brown, CFO Kosmic
