

Triumph

Paperless Picking

TECHNOLOGY

to optimise warehouse efficiency

TRIUMPH BUSINESS SYSTEMS

So much more than just a system to optimise your warehouse operations, Triumph is a powerful, awarding winning Enterprise Resource Planning (ERP) package.

Specifically developed and designed for Australian businesses, Triumph is a fully integrated package of 30 plus modules that seamlessly link together to manage all the information and business processes across your organisation.

And as your business develops and grows, Triumph offers an unparalleled ability to easily add on modules and users, making it the most capable entry level ERP package on the market today.

Triumph – incredibly powerful and incredible value for money.

One of the most inefficient functions in a warehouse is a paper-based system of order picking. Aside from being labour intensive, it is subject to costly human error including misread quantities and the incorrect selection or total omission of items.

Employing mobile technology is key to optimising the efficiency of warehouse operations and is one of the most valuable tools that your business can implement to increase profitability and eliminate picking errors.

Triumph “Paperless Picking” brings state-of-the-art software and wireless technology to the picking process, increasing accuracy to over 99 percent and improving the overall productivity of staff.

The software is designed for use with smart mobile handheld scanners linked wirelessly to Triumph ERP. Picking staff are guided through the warehouse in the most efficient way while products to be picked are displayed on the screen with their bin location, code, description and a picture, as well as the specific quantity required.

The system is totally interactive with your database, meaning you always have an accurate, up to the minute picture of stock levels.

And the costs of implementing Triumph “Paperless Picking” will quickly be offset by the savings from improvements in productivity and accuracy.

Investing in Triumph's "Paperless Picking" has been a very positive step forward for Allpet Products. As a result, we have become more efficient and have reduced warehousing and distribution costs. The picking staff now make fewer picking errors and sales staff consequently deal with far fewer requests for credits. New staff can find products as soon as they turn on the hand held scanner whereas previously the learning curve was many weeks. Our warehouse manager can now report on each picker to compare their pick rates against industry standards. Paperless Picking has been one of the smartest investments we have made and we only wish we had done it earlier.

Allpet Products is a leading wholesaler and manufacturer of quality pet products. We have been operating for over 30 years and currently service Australian and New Zealand speciality pet retailers.

The Triumph Edge

Improved performance through efficiency

- Mobile technology integrated with your database allowing total visibility and control of inventory and stock levels.
- Massively improved staff efficiency and picking accuracy.
- No paper, no waste.
- Options to:
 - force a barcode to be scanned before it can be picked
 - split orders into multiple picking slips by department (eg. frozen and dry goods)
 - manage picking staff by different customer groups (eg. metro and country)
- Management dashboard providing full control over order priorities and knowledge of who is picking what.
- Orders taken in the field utilising wireless technology, or via Triumph's fully integrated web shop, can be instantly processed by the warehouse.
- Improved customer service due to faster and more accurate delivery of goods.

Devices

Triumph "Paperless Picking" is a HTML5 web application designed to work with modern touch screen scanning devices with wireless or cellular connections and a unique Triumph user login for each device.

Works with:

- Smart phones
- iPad, Android or Windows tablet
- Windows workstations

Requires mobile communications software (from \$60* ex GST per device, per month). Hardware not included.
